PROFESSIONAL SUMMARY

IT Support and Technical Support professional with 3+ years of hands-on experience supporting users, endpoints, applications, and enterprise IT environments. Resolved 1,200+ service desk tickets and supported large-scale endpoint deployments in healthcare. Hands-on with Microsoft 365, Entra ID, Intune, Microsoft Defender, Active Directory, networking, PowerShell, SIEM, and endpoint security. eJPTv2 certified with practical cybersecurity lab experience.

CORE SKILLS

IT Support & Systems: Technical Support, Service Desk, Windows 10/11, Active Directory, Group Policy, TeamDynamix, hardware/software troubleshooting, remote support, software deployment
Microsoft 365: Microsoft 365, Entra ID, Intune, Conditional Access, MFA, Defender for Business, Exchange Online, SharePoint, OneDrive, Microsoft Graph, PowerShell
Cybersecurity & Networking: SIEM, Splunk, Wazuh, endpoint security/EDR, incident investigation, network security, Wireshark, Nmap, Linux, TCP/IP, DNS, DHCP

PROFESSIONAL EXPERIENCE

SamaLink | Beirut, Lebanon **May 2024 - Present**

Technical Support Specialist

- Provide remote and on-site technical support across hardware, software, Windows operating systems, connectivity, and general IT infrastructure.
- Diagnose and resolve desktop, application, network, and system issues using structured troubleshooting and root-cause analysis.
- Perform system maintenance, software installation, upgrades, configuration, and support for new and existing devices.
- Coordinate with Internet Service Providers and external vendors to troubleshoot connectivity incidents and support timely resolution of outages; prioritize and escalate advanced issues when required.

American University of Beirut Medical Center (AUBMC) | Beirut, Lebanon **Nov 2022 - Aug 2023**

IT Service Desk Delivery Specialist

- Logged, tracked, and resolved 1,200+ end-user incidents and service requests involving software, hardware, access, and workstation issues, escalating complex cases when required.
- Installed and configured software on enterprise endpoints and communicated technical solutions clearly to non-technical users through incident resolution.
- Supported the deployment of Epic EHR across approximately 800 workstations in a healthcare environment.
- Identified opportunities to improve IT service delivery, reduce downtime, improve response times, and strengthen operational efficiency.

SELECTED TECHNICAL PROJECTS

Microsoft 365 Enterprise Administration & Security Lab - Built a cloud-only Microsoft 365 Business Premium environment using Entra ID, MFA/Conditional Access, Intune compliance and security baselines, application deployment, update rings, Defender for Business, EICAR/EDR validation, and Microsoft Graph PowerShell reporting.
CyberLab Enterprise - Active Directory & Splunk - Built an AD lab with users/OUs/GPOs, advanced Windows auditing, PowerShell 4104 and process 4688 telemetry, Splunk forwarding, dashboards, alerts, and attack-validation scenarios.
Wazuh SIEM Detection Lab - Implemented endpoint monitoring, file integrity monitoring, a custom detection rule, and dashboards to validate security events and alerting workflows.

EDUCATION

Lebanese International University | Bachelor of Management Information Systems, 2019
